

**Read manual instructions  
about the rear body mount  
carefully. Several versions  
are included.**

**B0560 caster angle tool** **Opt**

**B0561 lower arm insert  
tool (assemble/disassemble)** **Opt**

**The layshaft height can be adjusted  
to the chosen spur gear size**

**Take off only the rear upper deck only  
to be able to change the rear differential.**

**Choose which position  
of the body post suits best  
to the wanted body shell  
(Narrow or wide)**

**Choose which position  
of the body stop screw suits best  
to the wanted body shell  
(inside or outside)**

***With the 1.5mm aluminium chassis you have a variety of flex settings. This makes a 2.25mm carbon chassis unnecessary. The COG would increase by ap. 0.75mm, which would have a big disadvantage.***

***Cut the bumper to the certain lower deck level with a hobby knife***

***Access holes for ackermann adjustment***

***Access to the the pinion set screw***

***It is recommended to use the wanted setup sheet  
aside throughout the assembly*** 

**Quick info**
